Function Meets Aesthetics with the Geo Collection

Communication tools have all too often been displayed as large squares or rectangles mounted on a wall for all to gather around. Intentionally designed to elevate communication and break the visual box, the Geo Collection provides a functional art installation for any office space. All products within the Geo Collection feature clean lines and trapezoidal shapes, fully functional in a meeting environment, and visually attractive when not in use. The designs command attention, create intentional meeting space, and foster clearer communication and collaboration.

Aesthetic

Laminated base panels, fabric-wrapped framing, and matte black powder-coated finishes paired with an A-frame shaping, gives Geo a unique, modern aesthetic.

Functional

All products are equipped with a tempered low iron glass surface to create a clean, easy-to-use canvas for your ideas.

Possibilities

Choose from our collection of standard finishes, or create your own. With the ability to color-match and use provided fabrics, you can design a Geo unit that is unique to your space.

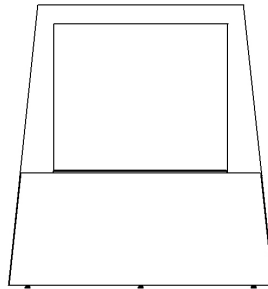

Inspirational

The Geo Collection transforms traditional components of office equipment into bold, modern furniture pieces that foster inspiration and collaboration.
